1. PilotDemandStats.github.io
2. My topic would be on the demand for commercial pilots within the past 10 years. It would detail the extent to which demand for commercial pilots has changed within the past 10 years. It would include different visuals, like graphs, and a lot of data tables. It'll detail how, as of late, demand has generally increased in the job market causing a huge shortage. It's a demonstration of my interest in aviation and will include details of my background.
3. - Main Page
   - Data Tables
   - Details per Year
   - Sources
   - My Background
4. The data I'll be manipulating is the number year for each web page, including the tables and details per year. This will allow the user to view different details on the aviation job climate based on the year they input. It'll give the user different values in formatted tables and graphs for the year they input.
